**Midlands Startup of
the year Winners**

Construction and Building
Services
2023

**TLA PropTech Net
Zero Winners**

2022-23

What are the elements of retrofit?

Insulation

Improve your home's ability to retain heat (and stay cool in the summer)

Reduce your heating bill

Ventilation

Make sure there is no moisture build up and ensure healthy air flow in the home

Reduce heat lost from unnecessary draughts

Generation

Generate and/or store energy at home

Reduce your electricity bill by avoiding using energy from the grid

Low Carbon Heating

Move your home to a low carbon form of heating

Reduce carbon emissions and energy bills

Bringing it all together

Understand your homes current situation, what work needs to be done and the **best order** for your needs

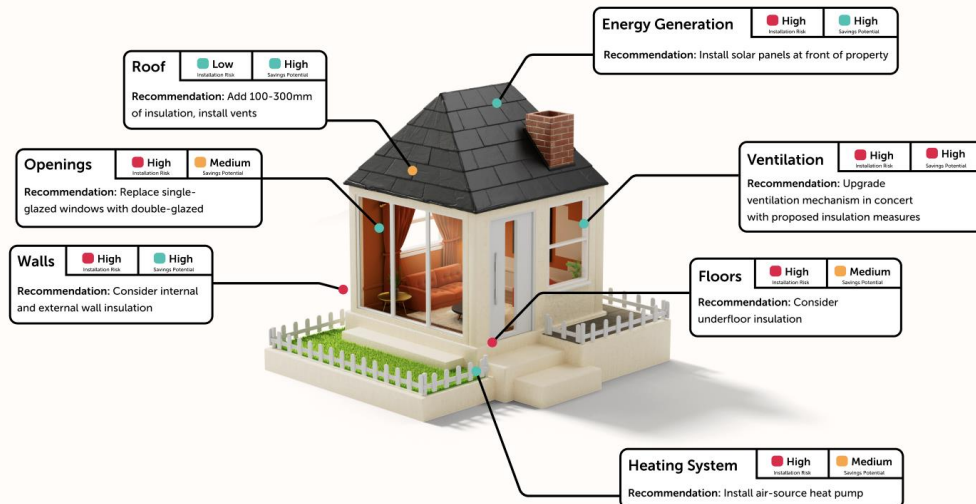

Understand your **budget, financing options** and any **grants** you're eligible for

Design your project and connect with quality **installers**

Make sure you have all the **certificates and warranties** for everything installed and understand any **maintenance requirements** from the installers

24 TEST STREET, LONDON, AA1 34

	YOUR HOME NOW	WITH OUR RECOMMENDED PLAN	
Yearly Energy Bills	£1800 - £2500	£1500 - £2000	20-30% projected savings!
Yearly CO2 Emissions	2000 - 2800 kg	1000 - 2500 kg	20-30% projected savings!

Delivering low carbon homes,
without the hassle
